

V2.0 - 2024

PLUSPLUS APP ACCESSIBILITY

Policy

- PlusPlus uses a standard and a combination of automated tooling and manual testing to evaluate accessibility in our product on a regular cadence.
- We prioritize regular dedicated work on accessibility concerns.
- We include accessibility concerns as part of our development process for our product.
- We pursue ongoing regular developer education with regards to common accessibility issues and fixes.

Standard

- PlusPlus uses the WCAG2.1 Standard to identify defects in accessibility and remediations.

Testing

- Google Chrome's Lighthouse report
- [axe DevTool](#): Web Accessibility Testing
- WAVE: <https://wave.webaim.org/extension/>
- Manual testing for compliance

Workflow

- On a quarterly basis the design team audits major platform features with a combination of automated and manual accessibility testing. The accessibility review ticket lives in our application backlog and major or very common issues are raised as subtasks.
- On an ongoing basis, the design review includes an accessibility review. This may include automated tools and manual accessibility testing.
- Design presents accessibility issues on a regular cadence to the product org to drive adoption/knowledge of accessibility issues.
